  Percentage: 88.5%, Year of completion: 2017

PROJECTS

The-Perfect-Guess-Game using Python
(https://github.com/divyanshu2222/The-Perfect-Guess-Game)

- The concept of this game is to guess the number. You have to guess the number in a very small number of attempts. The computer will give you a hint whether the number you have entered is near or not.

Blood Bank Management System using Python, Tkinter and SQLite Database
(https://github.com/divyanshu2222/Blood-Bank-Management-System)

- It keeps track of the Blood Group Availability data. It maintains donor and receiver data and includes functions such as Update, Delete, Search, View, and Check.
- All information is saved or updated in an SQLite database.

Hotel and Taxi Booking Website Using HTML, CSS and Bootstrap
(https://github.com/divyanshu2222/Hotel-and-Taxi-Booking)

- It is only the frontend of our website. It contains a Welcome Page, Home Page, Room Page and Payment Page.
- Welcome Page contains Form and basic details of our website.

Modern Portfolio Page *(https://github.com/divyanshu2222/ModernPortfolioPage)*
- Using HTML, CSS, and JavaScript, create a modern portfolio. There are two modes: bright and dark.
- I applied a ripple effect to it.

INTERNSHIPS

Edvizo Media Pvt. Ltd.: I worked as a social media coordinator for 3-months throughout my internship.
ITM, Institute of Technology & Management: It was a 1-month internship in HTML, CSS and Web Design.
LetsGrowMore: Web Developer Intern. It was a 1-month internship.
